# Energy in Progress

---

human energy®

The world never stops moving, growing, evolving.

It demands energy that evolves with it.

Meeting this challenge will take more than one solution and more than a little time.

It's the work that makes progress possible.

Work that drives us, inspires us.

To develop innovations that help us responsibly produce oil and gas and help other industries do what they do with less emissions too, delivering the energy we need today while forging new paths to the future in ways that are affordable, reliable, and ever cleaner.

That's energy in progress.
